3. The Contractor was late in delivery of the prototype due to technical difficulties not completely under platy control. however, some of time difficulties could have been avoided by inspection and quality control. The performal involved were very conscientions and excended considerable time and effort in attempting to meet the contractural delivery date in probably not ment deformable programments such as this one. However, their local representative reports that the company intends to try to become more competitive with respect to smaller procurements and him design and fabrication of optical instruments.
